Instructions for Installation of MBS Revit Waldram Tools V6.0

- Required setup files can be downloaded from here.
 <u>https://www.mbs-software.co.uk/downloads/waldramtools</u>
- Click Revit Version tab
- Download the installation package Revit Waldram Tools Setup.exe
 - Please Close Revit and all MBS console services and wait for 60 seconds to allow the files to be released.
 - The RevitWaldramToolsSetup.exe file must be run by Right Clicking the file and Selecting Run as Administrator option.
 This ensures future updates can be obtained without admin permission.
 - It installs the drivers for Des key licensing dongle, .Net framework, Report Viewer and Radiance dependencies along with the Waldram tools DLL and settings files.

| 💮 Radiance Setup | | _ | | × |
|---|---|-----|------|-----|
| 6 | Install Options Choose options for installing Radiance | | | |
| By default Radiance does not add its directory to the system PATH. | | | | |
| Do not add radiance to the system PATH Add radiance to the system PATH for all users Add radiance to the system PATH for current user | | | | |
